CAREER OBJECTIVE

A motivated Information Science & Engineering student at NMAM Institute of Technology with a strong interest in software development, Artificial Intelligence, and modern web technologies. Seeking opportunities to apply technical skills, explore innovative solutions, and contribute to real-world projects that create meaningful impact. Passionate about building scalable, user-centric applications and continuously growing as a developer.

EDUCATION

NMAM Institute of Technology, Nitte, Karkala Bachelor of Technology in Information Science & Engineering	2024 – 2028 Pursuing
Creative Pre-University College Karnataka State Board (PUC)	2022 – 2024 Grade: 93.33%
Sri Laxmi Janardhan International School, Belman Central Board of Secondary Education (CBSE)	– 2022 Grade: 90.6%

PROJECTS

Hospital Management System

A comprehensive web-based Hospital Management System designed to streamline and digitize day-to-day hospital operations. The system facilitates patient registration, appointment scheduling, doctor assignment, and medical record management through an intuitive interface. Includes modules for billing, prescription tracking, and an admin dashboard to monitor hospital-wide activity in real time.

- **Tech Stack:** Python (Flask), React.js, MySQL, HTML, CSS, JavaScript

Weather Monitoring System

A real-time weather monitoring application that fetches and displays live meteorological data for any location worldwide. The system presents temperature, humidity, wind speed, and weather forecasts through interactive charts and a clean, responsive UI. Integrates with a third-party weather API and supports location-based auto-detection for a seamless user experience.

- **Tech Stack:** React.js, Node.js, OpenWeatherMap API, Chart.js, CSS

EXPERIENCE

TechSpark Solutions – Web Development Intern <i>Bangalore, India Software & Product Development</i>	June 2025 – August 2025
---	--------------------------------

- Developed and maintained responsive web application features using React.js and Node.js, improving overall UI performance and user experience.
- Collaborated with a cross-functional team to design and implement RESTful APIs, integrating front-end and back-end services efficiently.

CodeNest Labs – Junior Developer Intern <i>Remote AI & Automation</i>	December 2025 – February 2026
---	--------------------------------------

- Built automation scripts and data pipelines using Python to support internal reporting workflows, reducing manual effort by approximately 40%.
- Assisted in integrating machine learning models into a web-based dashboard for real-time data visualization and decision support.

HACKATHONS

- o **Smart India Hackathon (SIH)** – Participated in India's premier national-level government innovation hackathon.
- o **Hackfest** – Competed in the national-level hackathon at NMAMIT, developing innovative solutions for local community challenges.

SKILLS

- o **Programming Languages:** Python, Java, C, C++
- o **Web Development:** HTML, CSS, JavaScript, React.js, Node.js
- o **Databases:** MySQL, PostgreSQL

- o **Tools & Platforms:** Git, GitHub, VS Code, Postman
- o **Concepts:** Data Structures & Algorithms, OOP, REST APIs, Agile Development

CERTIFICATIONS

- o Microsoft Azure Learning Challenge - AINNOVATION-2025
- o Microsoft AI Learning Challenge - AINNOVATION-2025
- o Microsoft Applied AI Learning Challenge - AINNOVATION-2025
- o Programming For Everybody (Getting Started With Python) - University of Michigan, Coursera

PERSONAL DETAILS

Date of Birth: 27 September 2006

Languages Known: English, Hindi, Kannada, Tulu

Nationality: Indian

Hobbies: Swimming and Travelling
